

*the*  
MINNESOTA  
PROJECT

You are cordially invited to attend

**“Thoughtful Landscapes in a Changing World”**  
Centered on Sustainability Community Discussion Series

Hosted by The Minnesota Project and Sponsored by Bachman’s

Learn about and discuss practical solutions to build and manage your landscape to reduce its impact and increase its resiliency in Minnesota’s changing environment.

**Discussion led by Fred Rozumalski**, Landscape Architect practicing sustainable land design ecology through  
Barr Engineering Company in Minneapolis, MN

**Thursday, March 17, 2011**

6:00 PM– 8:00 PM

Bachman’s Heritage Room  
6010 Lyndale Ave South  
Minneapolis, MN 55419

Light appetizers by **Red Stag Supper Club** and refreshments will be served.

A suggested donation of \$20 is appreciated

About the Speaker: **Fred Rozumalski** is a landscape architect practicing sustainable land design ecology through Barr Engineering Company in Minneapolis, Minnesota. He strives to create diverse, ecologically sound and beautiful landscapes that function to meet people’s needs and desires. A believer in the power of every landowner’s potential to help regenerate ecological balance, Fred has developed a specialty in designing practical landscapes that sequester carbon, harvest storm water and conserve energy.

His most recent accomplishments include co-authoring a Minnesota DNR-sponsored book, *Lakescaping for Wildlife and Water Quality*, and winning a National Design Award from the American Society of Landscape Architects Professional Awards for the innovative design of a sedge meadow restoration and interpretive boardwalk at the Minnesota Landscape Arboretum. Fred holds degrees in Horticulture, Ecology and Landscape Architecture
